

## Building and Grounds Committee Meeting

3/8/21 @ 6:30 P.M.

### Attendees:

Jeremy Bloeser, Josh Paris, Shawn Matson, Dr. Andy Pushchak, Marty Pushchak, Nicole Lee, Tara Pound, Amanda Farrell, Ken Berlin and Vicki Bendig.

Committee Chairperson, Josh Paris called the meeting to order.

Mr. Berlin reviewed a short history of several of the larger building and ground renovations that have taken place in the middle and high school in previous years. He went on to reference the heat pumps at WAEC and the need for replacement as they are now 27 years old.

Mr. Berlin then reviewed the cost sheet for the WAEC Heat Pump Project as well as images of the condition of the current units.

Eric Schultz further explained the cost savings in the project because they are replacing unit for unit and therefore an engineer is not needed. Savings will also be noted in the newer chemicals that are used for the system as well as the increase in efficiency.

There were several questions from School Board Members and community members that were addressed.

Prior to the conclusion of the meeting it was determined that a motion would be added to the March agenda so the Board may vote to determine whether or not the project should take place this summer.
